COLOR DOME TYPE CAMERA

MANUAL

680 TVL

960H, UTC, Defog

The lightning flash with an arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated dangerous voltage within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

INFORMATION - This equipment has been tested and found to comply with limits for a Class A digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

WARNING - Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

CAUTION : To prevent electric shock and risk of fire hazards:

Do NOT use power sources other than that specified.

Do NOT expose this appliance to rain or moisture.

This installation should be made by a qualified service person and should conform to all local codes

■ Warning

The camera needs periodic inspection.

Contact an authorized technician for inspection.

Stop using your camera when you find a malfunction.

If you use your camera around smoke or unusual heat for a long time, fire may be caused.

Do not install the camera on a surface that can not support it.

Unless the surface is suitable, it could cause falling or other hazards.

Do not hold plug with wet hands.

It could cause an electric shock.

Do not disassemble the camera.

It may result in fire, electric shock or other hazards.

Do not use the camera close to a gas or oil leak.

It may result in fire or other hazards.

■ Precautions

Do not install the camera in extreme temperature conditions.

Only use the camera under conditions where temperatures are between -10°C and +50°C. Be especially careful to provide ventilation when operating under high temperatures.

Do not install or use the camera in an environment where the humidity is high.

It can cause the image quality to be poor.

Do not install the camera under unstable lighting conditions.

Severe lighting change or flicker can cause the camera to work improperly.

Do not touch the front lens of the camera.

It is one of the most important parts of the camera. Be careful not to be stained by fingerprint.

Do not drop the camera or subject it to physical shocks.

It can cause malfunctions to occur.

Never keep the camera face to strong light directly.

It can damage the CCD.

Do not expose the camera to rain or spill beverage on it.

If it gets wet, wipe it dry immediately. Liquids can contain minerals that corrode the electronic components.

Do not expose the camera to radioactivity.

If it is exposed to radioactivity, For heated CCD, it will be out of order.

1. Features

■ 1/3" 520K/610K Sony Super-HAD CCD II

Minimum Low Illumination (F1.2, 50 IRE)

■ High Resolution 680 TV Lines

This camera has realized high resolution of **680** TV lines using the top-notch full digital image processing, 10 Bit A/D serial signal processing and special algorithm technologies.

■ DNR(Digital Noise Reduction)

The DNR technology removes low-light gain noise and afterimage to provide distinct and clear images even in dark environments.

■ DAY&NIGHT

This camera has the Day/Night function which outputs the filter changing signal with detecting the illumination condition.

DayNight operation features an 'auto' mode which automatically switches between day and night mode based on the level of illumination on the scene.

The EXT mode changes between day and night operation upon triggering from an external source. The DAY mode operates in daytime conditions to provide optimum colors, and the NIGHT mode operates in night-time conditions to enhance the definition of the image.

■ SMART IR

This camera supports SMART IR function which automatically adjust the infrared light required in a scene as the subject moves closer to or further away from the camera, resulting in a clear image that is not washed out or too dark.

■ DEFOG

This camera supports DEFOG function which does a process of clearing blurred image caused by fog and snow by analyzing the brightness of input image and compensating the color of the image.

■ OSD(On Screen Display)

This camera supports the OSD function which is used to control the camera with multi languages. The camera can be controlled by selecting text displayed on the monitor screen.

■ CCVC(Camera Control Via Coaxial cable)

This is a remote control function that overlaps the coaxial cable (for a transfer of the video signal) with the control signal. In installation or repair, this helps you control the communication controller(optional) without additional cabling.

2. Cable Connection & OSD Control

1) Cable Connection

2) OSD Control

① 3AXIS BRACKET

- Please loosen screws and fix tilted and panned position.

③ LENS : Vari-Focal Auto Iris Lens

③ OSD PCB

- **SETUP button** : Used for the menu display. This button can be used to confirm settings after changing the value of the selected function or current conditions.
- **UP & DOWN buttons** : Used for selecting items by moving the cursor up or down on the menu screen.
- **LEFT & RIGHT buttons** : Used when changing item values, by moving the cursor to the left or right on the menu screen

3. Setup Menu Operation

◆ Menu configuration

CAMERA SET	CAMERA TITLE FONT COLOR VERSION	CAM ID COMMUNICATION	ID DISP LANGUAGE
EXPOSURE	LENS FLK	BRIGHTNESS AGC	SHUTTER
DAY/NIGHT	AUTO EXT.	NIGHT	DAY
WHITE BAL.	ATW	MANUAL	PUSH
MONITOR	GAMMA SHADING	CHROMA PED. LV.	SHARPNESS
IMAGE	BLACKLIGHT H-MIRROR	CONTRAST PRIVACY	POSI/NEGA
DNR	LOW OFF	HIGH	MIDDLE
MOTION	SENSITIVITY TOP RIGHT	AREA NO. BOTTOM	AREA USE LEFT
EXIT	SAVE	INITIAL	RESTORE

Please press the SETUP button, Settings can now be made. The SETUP menu is displayed on the monitor. Please select any function you wish to activate by using the UP and DOWN buttons. The arrow can be moved up or down by using the UP and DOWN buttons. Please position the arrow to point to the function you wish to operate.

Key Functions

- ▲ Up
- ▼ Down
- ◀ Left
- ▶ Right
- ⓔ Enter(Setup)

◆ CAMERA SET

You can set cam title, cam ID, Line Lock, Font Color, Communication, Language, version
This function can adjust the intensity of radiation incoming to the camera.

Use the "▲" "▼" "◀" "▶" "ⓔ" switch to select a menu item.

CAMERA SET		
CAMERA TITLE	ON	
CAM ID	1	<input type="text"/>
ID DISP.	OFF	
FONT COLOR	6	<input type="text"/>
COMMUNICATION		
LANGUAGE	ENG	
VERSION	1ATNIA	
RETURN		

■ CAM TITLE

Make a set camera title using below numbers and alphabets

(0,1,2,3,4,5,6,7,8,9,A,B,C,D,E,F,G,H,I,J,K,L,M,N,O,P,Q,R,S,T,U,V,W,X,Y, Z)

◇ **OFF**: disable CAMERA TITLE.

◇ **ON**: display CAMERA TITLE.

CAM TITLE	
<input type="text"/>	
ENTER	

■ CAM ID

You can set CAMERA number from 1 to 255.

■ ID DISP

◇ **OFF**: disable CAMERA NO/ID.

◇ **ON**: display CAMERA NO/ID

■ FONT COLOR

You can set CAMERA OSD Color.

(white, cyan, green, magenta, red, blue, yellow, gray)

■ COMMUNICATION (COAXIAL)

This camera can be adjust by remote controller via coaxial.

You can select the Protocol as 15BIT, 32BIT.

■ LANGUAGE

You can set language.

(English, Chinese, Korean, Japanese, French, Deutsch, Italian, Spanish, Russian)

■ VERSION

Version of the camera will be display on the monitor.

◆ EXPOSURE

■ ALC (Automatic Light Control)

MENU	
CAMERA SET	
EXPOSURE	ALC
DAY/ NIGHT	AUTO
WHITE BAL.	ATW
MONITOR	
IMAGE	
DNR	LOW
MOTION	OFF
EXIT	SAVE

EXPOSURE	
LENS	ALC
BRIGHTNESS	8 <input type="text"/>
SHUTTER	1/ 60
FLK	OFF
AGC	20 <input type="text"/>
RETURN	

◇ **BRIGHTNESS(1~20)**

The **BRIGHTNESS** menu is used to adjust the overall brightness, where "▶" will increase the brightness and "◀" will decrease it.

◇ **SHUTTER**

The **SHUTTER** menu is used to set the fixed high-speed electronic shutter, auto high speed electronic shutter.

You can select one of 13 options from 1/100(PAL:1/120) for the fixed high speed electronic shutter, which is mostly used for imaging a fast moving object.

You can select one of shutter speed, 1/120(1/100), 1/250, 1/500, 1/700, 1/1K, 1/1.6K, 1/2.5K, 1/5K, 1/7K, 1/10K, 1/30K, 1/60K, 1/120K.

◇ **FLK (FLICKER LESS)**

If set to ON, the shutter speed will be fixed to 1/100(PAL:1/120) second.

This will prevent possible screen distortion to a mismatch between the vertical sync frequency and the blinking frequency of the lighting.

◇ **AGC(Automatic Gain Control) LEVEL : AGC max level from 0 to 20.(6dB to 40dB)**

The **AGC LEVEL** menu is used to adjust the overall AGC max level, where "▶" will increase the AGC max level and "◀" will decrease it.

■ **ELC(Electronic Light Control)**

◇ **BRIGHTNESS**

The **BRIGHTNESS** menu is used to adjust the overall brightness, where "▶" will increase the brightness and "◀" will decrease it.

◇ **SHUTTER**

The **SHUTTER** menu is used to set the fixed high-speed electronic shutter, auto high speed electronic shutter. You can select one of 13 options from 1/100(PAL:1/120) for the fixed high

speed electronic shutter, which is mostly used for imaging a fast moving object.

You can select one of shutter speed, 1/120(1/100), 1/250, 1/500, 1/700, 1/1K, 1/1.6K, 1/2.5K, 1/5K, 1/7K, 1/10K, 1/30K, 1/60K, 1/120K.

◇ **FLK(FLICKER LESS)**

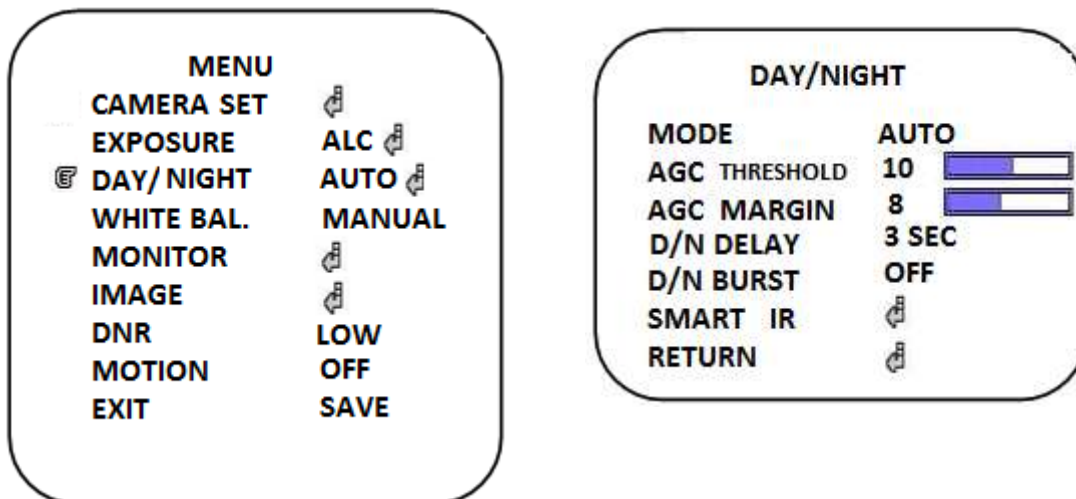

If set to ON, the shutter speed will be fixed to 1/100(PAL:1/120) second. This will prevent possible screen distortion to a mismatch between the vertical sync frequency and the blinking frequency of the lighting.

◇ **AGC(Automatic Gain Control) LEVEL : AGC max level from 0 to 20.(6dB to 40dB)**

The **AGC LEVEL** menu is used to adjust the overall AGC max level, where "▶" will increase the AGC max level and "◀" will decrease it.

◆ DAY/NIGHT(AUTO, DAY, NIGHT, EXT)

■ AUTO

The camera will automatically switch between DAY and NIGHT mode, according to the lighting condition. If you press the **Ⓔ (Enter)** switch with an **AUTO** based sub menu selected, you will see the appropriate screen.

◇ AGC THRESHOLD

Set AGC THRESHOLD that is standard value of the AGC gain, when changing from DAY to NIGHT or from NIGHT to DAY.

◇ **AGC MARGIN:** Set AGC MARGIN.

◇ **DAY & NIGHT DELAY TIME:** Set day/night switching delay time.

◇ SMART IR

Set SMART IR function as ON or OFF. If set to on, the brightness of IR and saturation phenomenon is automatically adjusted.

■ DAY

If set to **COLOR** mode, it will be fixed to **COLOR** mode regardless of the ambient conditions.

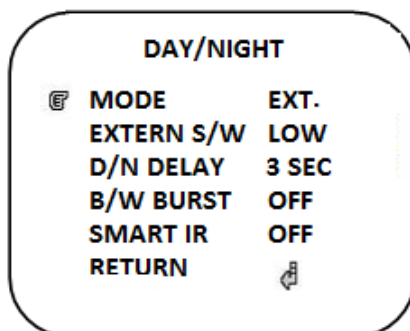

■ NIGHT

If set to **NIGHR** mode, it will be fixed to black-and-white mode regardless of ambient conditions. If you press **Ⓔ (Enter)** switch with a **NIGHT** sub menu selected, you will see a menu where you can select set BURST ON or OFF.

■EXT.

This enables to switch between DAY and NIGHT mode using the interface with external signal.

◆ WHITE BAL.(White Balance)

Use the White Balance function to adjust the screen color.

◇ ATW

The camera can automatically adjust the color temperature in real time, according to the ambient conditions. The color temperature ranges from 2,000K ~ 10,000K.

◇ PUSH

If you press the **Ⓔ (Enter)** switch in the appropriate item position, Auto White Balance will perform once.

◇ MANUAL

In this mode, you can set the color temperature of RED and BLUE.

◆ MONITOR

Please change the settings value of video appropriate to your monitor.

◇ GAMMA

0.4,0.45,0.5,0.55,0.6,0.65

- ◇ **CHROMA:** Color Gain Set
- ◇ **SHARPNESS:** Aperture (Horizontal,Vertical) Set
- ◇ **SHADING:** Lens Shading
- ◇ **PED. LV.:** Pedestal Level Set
- ◆ **IMAGE**

■ BACK LIGHT

◇ BLC

Adjusts the area to be enhanced and sets the level.

◇ HLC

If the scene contains extremely bright light areas such as; from car headlight, the light can mask out much of the on-screen detail.

- LEVEL: Adjusts the brightness level of a monitoring area.

■ CONTRAST

◇ D-WDR

When there are both bright and dark areas at the same time, this mode makes both areas distinctive.

◇ DEFOG

This camera supports DEFOG function which does a process of clearing blurred image caused by fog and snow by analyzing the brightness of input image and compensating the color of the image

◇ POSI / NEGA

Switch to negative color.

■ H - MIRROR

◇ H – MIRROR

You can flip the picture

- MIRROR: Horizontal reverse pictures on the monitor.

◇ PRIVACY

You may conceal specific area on the screen with this 'PRIVACY' function.

You can set masking areas up to 8 zones.

◆ DNR(Digital Noise Reduction): OFF, LOW, MIDDLE, HIGH

You can configure the DNR(Digital Noise Reduction) related settings. It reduces the noise on the screen.

This is especially useful for a severely distorted screen

◆ MOTION

You can specify a detection area. Select area number and specify the sensitivity and size.

◇ SENSITIVITY

Set the sensitivity of the motion detection from 0(Highest) to 15(Lowest).

◇ AREA NO

Specify a detection area. You can set the area from 1 to 4.

◇ AREA USE

With the DISPLAY option set to ON, a motion function will be displayed on the screen, if detected.

◇ TOP/ BOTTOM/LEFT/ RIGHT

- **TOP**: extends or reduces upper detection area.
- **BOTTOM**: extends or reduces lower detection area.
- **LEF**: extends or reduces detection area on the left.
- **RIGHT**: extends or reduces detection area on the right

◆ EXIT

Select a desired EXIT mode using the switch depending on the camera purpose

◇ **RESTORE**: not saves the current settings. ◇ **INITIAL**: reset the camera settings

◇ **SAVE**: save the current settings

4. Troubleshooting

If there are problems in operation, please refer to the items below. If the problem persists, please contact the agent you purchased this product from.

Problems	Troubleshooting
Nothing appears on the screen.	<ul style="list-style-type: none">• Please check the power connection.• Please check the video signal line connection.• Please check and make sure that the auto lens switch is set to DC (VIDEO) when using a VIDEO(DC) lens.
The video image is not clear.	<ul style="list-style-type: none">• Please check if the lens is clean. Please clean the lens with a clean cloth or brush.• Please adjust the contrast feature of the monitor.• Please readjust the back focus of the camera.
The screen is dark.	<ul style="list-style-type: none">• Please adjust the contrast feature of the monitor.• If you have an intermediate device, set the 75 / Hi-z properly, and check the terminals.• Please check if an auto iris lens is being used and adjust the brightness level.
There is a problem with the camera operation.	<ul style="list-style-type: none">• Please check if an appropriate power source to the camera complies with the manufacturer's standard requirement, or if the voltage keeps changing.
The MOTION DETECTION function is not working.	<ul style="list-style-type: none">• Please check if 'MOTION DETECTION' mode is turned on.• Please check if the MD LEVEL is too low.• Please check the setting of the MD AREA.
Colors are not quite right.	<ul style="list-style-type: none">• Please check the 'WHITE BAL' setting
The screen is flickering.	<ul style="list-style-type: none">• Please check if the camera is facing directly into sunlight or fluorescent light.• Please check if an auto iris lens is being used.• Please check the connection of the lens connector cable.
COLOR mode is not working.	<ul style="list-style-type: none">• Please check if the AGC menu is set to the OFF position.
SENS-UP function is not working.	<ul style="list-style-type: none">• Please check if the AGC menu is set to the OFF position.• Please check if the SHUTTER menu is set to MANUAL mode.
